Summary

Information Technology graduate specializing in Software Development, with practical experience building 3+ responsive web applications using React.js, JavaScript (ES6+), HTML5, and CSS3. Skilled in developing role-based interfaces, integrating REST APIs, and building web application features such as product management, shopping carts, and order workflows. Familiar with Tailwind CSS, Bootstrap, Git, and GitHub. Seeking a Junior Front-End Developer role to contribute to user-focused web applications while continuing to grow professionally.

Skills

Languages: HTML5, CSS3, JavaScript (ES6+), Arabic (Native), English (A2-B1)
Frameworks & Libraries: React.js, Vite, Bootstrap, Tailwind CSS
Tools & Platforms: Git, GitHub, VS Code, npm, REST APIs, Axios
Core Skills: Responsive Design, REST API Integration, DOM Manipulation, RTL Layouts
Soft Skills: Focus, Modern, Structured, Problem-Solving, Team Collaboration, Adaptability, Communication

Professional Experience & Projects

Auto Parts Management System | *React.js, Vite, Tailwind CSS, Strapi, Axios*

- Developed 100% responsive automotive parts management system with 2 separate structured interfaces for administrators and customers.
- Implemented authentication and protected routes with role-based redirection for Admin and Customer users across 4+ core operational modules.
- Built 1 comprehensive admin dashboard with interfaces for managing products, categories, customers, inventory, and notifications.
- Developed 4+ customer-facing pages for product browsing, product details, shopping cart, and checkout workflow.
- Integrated the frontend with Strapi CMS using REST APIs to retrieve and manage application data efficiently.
- Implemented order creation, order item management, and inventory stock updates as part of the checkout workflow.
- Designed interfaces for point of sale (POS), invoices, reports, and system settings.
- Created an Arabic right-to-left (RTL) interface with a consistent dark theme and responsive layouts using Tailwind CSS.

Technologies: React.js, JavaScript (ES6+), Vite, Tailwind CSS, Strapi CMS, Axios, REST APIs, React Context, React Router, Git, GitHub

JavaScript To-Do List | *HTML5, CSS3, JavaScript*

- Developed an interactive task management application using vanilla JavaScript and DOM manipulation, improving task tracking efficiency.
- Implemented 3 core task features (creation, updating, and deletion) to manage user tasks dynamically.
- Built a structured interface for interacting with and managing tasks effectively.
- Applied core JavaScript concepts and event handling to update the interface based on user actions.

Technologies: HTML5, CSS3, JavaScript (ES6+), DOM Manipulation, Git

Movie UI Project | *HTML5, CSS3*

- Designed and developed a movie-themed web interface with a focus on visual consistency and user-friendly navigation.
- Created page layouts using HTML5 and CSS3 to organize movie-related content across multiple sections.
- Applied 100% responsive web design techniques to improve the interface across different screen sizes.
- Used CSS styling and layout techniques to build a structured and visually appealing user interface.

Technologies: HTML5, CSS3, Responsive Web Design, Flexbox/Grid

Education

Delta Technological University **2026**

Bachelor's Degree in Information Technology Software Development | *Very Good (80.04%)* *Kafr El Sheikh, Egypt*

Training & Workshops

EraaSoft: Web Development Training – completed practical, project-based learning focusing on modern web development workflows.

Digitera: Technical Track – completed rigorous technical training in September 2026.

IEEE El-Shorouk Academy Student Branch: Front-End Workshop – completed 30 intensive training hours, 2026.
